*Frey Brake Systems: It has been producing clutch cylinders and hydraulic brake master centers in Izmir since 1982. We have been producing spare parts for light commercial vehicles and passenger cars until 2008. Then we started producing agricultural vehicles and construction machinery parts. We have become a manufacturer specialized in the production of brake and clutch cylinders used for tractors and agricultural machinery vehicles. The biggest advantage of our company, which increases its product range day by day, is the possibility of producing in batches of minimum 100-150 units. We offer high quality products at good prices. We want to offer you competitive prices according to your specific market conditions. We are committed to producing high quality products for our customers. We are a team of 25 people and we have a monthly production capacity of approximately 5,000 units. We started exporting to Finland in 1998 and we continue our trade with the USA, Poland, Belgium, Morocco, Algeria, Canada and Middle Eastern countries. Our Frey brand is in great demand in many countries. We continue to increase our market share regularly.*
